

Nedgroup Investments XS Guarded Fund of Funds

Class A

June 2018

XS RANGE

RISK RATING

Risk reward profile

Equity and property investments are volatile by nature and subject to potential capital loss. For credit and income instruments, while unlikely, capital loss may also occur due to an event like the default of an issuer. The portfolio may be subject to currency fluctuations due to its international exposure.

Portfolio profile

The investment objective of the XS Guarded Solution is to secure the steady growth of income as well as preservation of capital. The Fund of Funds achieves its objective through investment in a diversified portfolio of domestic equity, domestic fixed interest, foreign equity and foreign fixed interest portfolios. Diversification across asset classes and a maximum equity exposure of 40% helps to reduce risk and volatility relative to an average prudential portfolio. The portfolio complies with Regulation 28 of the South African Pension Funds Act.

¹ The annualized total return is the average return earned by an investment each year over a given time period. Performance is calculated for the portfolio and individual investment performance may differ as a result of initial fees, the actual investment, the actual investment date, the date of reinvestment and dividend withholding tax. Due to the delayed release of inflation data, relevant benchmarks will lag by one month.

² Total Expense Ratio (TER), expressed as a percentage of the Fund, relates to expenses incurred in the administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction Costs (TC), expressed as a percentage of the Fund, relate to the costs incurred in buying and selling the underlying assets of the Fund. TC are a necessary cost in administering the fund and impact fund returns. It should not be considered in isolation as returns may be impacted by other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER. The Total Investment Charges expressed as a percentage of the Fund, relates to all investment costs of the Fund. Both the TER and TC of the Fund are calculated on an annualised basis, beginning 01/04/2015 and ending 31/03/2018.

Portfolio attributes

The XS Fund of Funds range consists of three actively managed multi-asset solutions, which mainly follow a specialist building block-approach. These solutions are invested across a diversified blend of underlying domestic and global fund managers. The selected fund managers are carefully appointed based on proven, consistent track records.

The core of the XS Guarded Fund of Fund is its strategic asset allocation with total equity exposure of 35.0% and total foreign exposure of 20%.

We employ a pragmatic approach to manager selection, seeking out the best managers in the areas we believe active managers can add value. We also use a low-cost, multi-asset passive fund that tracks the respective asset classes' market indices. Allocation to this fund fluctuates depending on the prevailing market conditions.

Tactical asset allocation positions are implemented based on the views of the Nedgroup Investment Multi-Manager team.

We believe the combination of strategic and tactical asset allocation implemented through specialist portfolio managers will most consistently achieve the XS Guarded objective of SA Inflation + 3% over a rolling 3-year period, with the added benefit of lower volatility.

Investment manager

Nedgroup Investments Multi-Manager is a dedicated asset management division within Nedgroup Investments that consists of a diverse team of investment professionals based in Cape Town and London. We specialise in asset allocation and fund manager research and base our investment decisions on fundamentally-driven research.

Investment philosophy

We follow a long-term, valuation driven investment approach. Our investment philosophy is anchored to the following ten principles:

1. Long term investing, well considered.
2. Compounding is a powerful force.
3. Asset allocation is an important driver of returns.
4. Diversification has benefits.
5. Risks need to be properly understood.
6. The price you pay (valuation) is an important determinant of future returns.
7. Emotions can erode the value of rational decision making.
8. Costs are important.
9. Forecasting is difficult, assumptions need to be carefully considered.
10. Sound stewardship principles will improve odds of clients meeting their goals.

Who we are

Nedgroup Collective Investments (RF) Proprietary Limited, is the company that is authorised in terms of the Collective Investment Schemes Control Act to administer the Nedgroup Investments unit trust funds. It is a member of the Association of Savings & Investment South Africa (ASISA).
